Backend: Express, AdonisJs, Laravel, Django, Flask

Prototyping: Figma, Adobe XD

Project Management: Jira, Linear

Testing: Selenium, Jest, Mocha, Cypress

VCS: Git

Devops: Docker, Github Actions, Gitlab CI, Fastlane

Mobile: CapacitorJs, Android

### LANGUAGES

Arabic : Native

English : C2 Level (TOEIC 980)

French : Bilingual

### EXPERIENCE

**Fullstack Software Engineer (Remote)**

November 2021 - Present

Metamaze | <https://metamaze.eu> | Antwerp, Belgium

Metamaze, Belgian Tech Startup of the Year 2022, is an AI-driven Intelligent Document Processing SaaS platform that enables companies to automatically process, extract and structure information from any type of document and/or email. I am part of the fullstack team leading the development of the company's adaptive ADP platform:

- Helped rewrite the entire frontend from scratch and establish a design system using React / Typescript, StencilJs.
- Improved developer experience by setting up new CI/CD pipelines to automate releases, linting and builds, also developed new internal tools to improve developer velocity.
- Lead the development of E2E tests using Cypress and Jest, and improved test coverage by 30%.
- Established a vulnerability management process to improve dependency management and platform security

● **Stack:** Typescript / MERN - MongoDB, React, Node (Express), GraphQL (Apollo), StencilJs

● **Other:** Docker, Github Actions, Azure Cloud, Mocha, Cypress (Testing framework)

**Lead Developer (Remote)**

April 2020 - November 2021

Yogalive - 6Wolves BV | <https://yogalive.com> | Antwerp, Belgium

YogaLive is a digital marketplace that connects yoga teachers and yoga practitioners via live-streaming yoga sessions. I worked with the founders to build the current product from scratch: 2 web platforms and a mobile application. I also handled the devops side of the product and setup automated pipelines for CI/CD using Github Actions.

● **Stack:** Typescript / MEVN - MongoDB, Vue 3, Node (Express)

● **Other:** Docker, Github Actions, Caprover, Jest (Testing framework), Capacitor Js, Fastlane

**IT Consultant - Software developer**

March 2019 - March 2020

Junior Enterprise: Centrale Nantes Etudes | Nantes, France

Freelance work in parallel of my studies:

- Developed a multi-tenant HR SaaS product for employee skill analysis and job accessibility.
- Developed tools for the IT team to manage internal services.

● **Stack:** LEMP - PHP (Laravel), Vue

● **Other:** Docker, Github Actions, Pest, Websockets

**Software Engineer Intern**

July 2019- August 2019

Coment | <https://coment.in> | Nantes, France

Coment is SaaS platform putting an end to the chaotic process of document review.

I worked in an agile team doing fullstack development to prepare for product launch:

- Developed new UI components and improved the overall UX of the application
- Created and deployed a product landing page
- Developed and deployed a PDF export microservice on GCP using Node and Puppeteer

● **Stack:** Serverless - GCF, Vue | Node (Express) for the PDF microservice

● **Other:** Wordpress (LEMP), Docker
